Election Statement:

I believe it is important that architects in Scotland have a close relationship with the RIBA, and that the RIAS and the RIBA co-operate closely with each other.

I am a partner in a small practice, and note that the vast majority of architects in Scotland are in small practices. I wish to represent their interests: procurement in particular is very important and must be made easier and fairer for small practices.

I am a past president of the RIAS, and believe that then Incorporation has made considerable strides in the past few years to become more transparent and democratic, with a close relationship to the chapters in Scotland. I am keen to see a similar transparency and democracy operating at the RIBA.
