Election Statement

As a passionate advocate for sustainable architecture, I am honored to present my candidacy for the role of Vice-President of the RIBA. My vision for the future of architecture is deeply rooted in addressing the pressing challenges of climate change and carbon reduction, while championing innovative and user-centric design practices.

With a personal manifesto dedicated to the continuation and advancement of sustainable practices within our industry, I bring a commitment to fostering meaningful change. As a Certified Passive House Designer, I have demonstrated my dedication to reducing energy consumption and promoting efficient, high-performance design solutions. This certification reflects my ability to integrate cutting-edge methodologies that prioritize both environmental responsibility and occupant well-being.

I believe that architecture holds the power to shape a more sustainable and equitable future. By embracing practices that minimize environmental impact and maximize energy efficiency, we can lead the way in creating resilient and adaptive built environments. My agenda is clear: to inspire and support our profession in adopting forward-thinking approaches that address the needs of today while safeguarding the resources of tomorrow.

As Vice-President, I will work collaboratively with members to ensure that RIBA continues to be a beacon of leadership in sustainable architecture. Together, we can drive innovation, advocate for policy changes, and empower architects to design with purpose and responsibility. I am committed to fostering a culture of inclusivity, creativity, and accountability within our profession.
