## 10. Doors - external and internal

Repeat checklist for different door types				
Door dimensions				
10.1	Is the effective clear door width suitable for:  • entrance doors  • inner lobby doors  • internal doors?	[ ]		
10.2	Is sufficient clear manoeuvring space available adjacent to the opening edge of the door?  • If not, is a power-operated door opening system provided?	[ ]		
Vision panels				
10.3	Are vision panels provided to entrance and entrance lobby doors?	[ ]		
10.4	<ul><li>Are vision panels provided to internal corridor doors?</li><li>To doors located on emergency exit routes?</li><li>To side panels of leaf-and-a-half doors?</li></ul>	[ ]		
10.5	Is the zone of visibility large enough?  Is it of a suitable configuration?  Is it in a suitable position?	[ ]		
10.6	Is there acceptable justification where vision panels are omitted or reduced in size?	[ ]		
Glaze	ed doors			
10.7	Are there manifestations for safety and visibility to glazed doors and side panels?  • Are they of a suitable size and height?  • Are they effective when viewed from both sides?  • Are they effective in different lighting conditions?	[ ]		

Are glazed door manifestations different to those on adjacent glazed screen?	[ ]			
Are sides and edges of glass doors adequately highlighted where adjacent to a glazed screen?	[ ]			
Are fully glazed doors avoided on corridors?	[ ]			
Is guarding provided where fully glazed doors may be held open?	[ ]			
Door markings				
Is there adequate visual contrast to the leading edge of:  doors that are held open  outward-opening doors to an internal access route?	[ ]	l		
General observations:				
	Are sides and edges of glass doors adequately highlighted where adjacent to a glazed screen?  Are fully glazed doors avoided on corridors?  Is guarding provided where fully glazed doors may be held open?  markings  Is there adequate visual contrast to the leading edge of:  • doors that are held open  • outward-opening doors to an internal access route?	Are sides and edges of glass doors adequately highlighted where adjacent to a glazed screen?  Are fully glazed doors avoided on corridors?  Is guarding provided where fully glazed doors may be held open?  Is there adequate visual contrast to the leading edge of:  doors that are held open  outward-opening doors to an internal access route?
