31. Websites

- **31.1** Has the website been designed in accordance with best practice guidelines, [] including:
 - Is the website logically structured and easy to navigate?
 - Is language simple and clear?
 - Is the font sans serif and commonly installed on most computers?
 - Is there effective tonal contrast between text, graphics and background?
 - Is there a text alternative to audio and image files?
 - Are unnecessary moving graphics avoided?
 - Are video sequences captioned, or is a link provided to a transcript of the audio and video content?

31.2	Does the design of the website offer the flexibility for individual users to	[]]
	adjust text and colour settings using their own browser?	

31.3 Is the web designer familiar with international guidelines on web [] accessibility?

General observations:
