Bee DP

Seeds of Change

A catalyst for neighbourhood-led enterprise across Cardiff that will up-skill communities and break-down social inequality in the city.

Planting the Seed

The **BeeDP** arrives in Cardiff as a community event, hosted by **local** volunteers and sponsored by **local** companies

Self-Nurturing Philosophy

This is a **regenerative** process, whereby skills can permeate outwards to other communities.

BeeDP starts as a small intervention and grows with community engagement.

Empowering Meaningful Change

A **Do-It-Yourself** approach to small scale interventions. These can be temporary or permanent, but are always **personal to the community** and focus on **reusing and recycling** materials.

BeeDP promotes pride and stewardship in your neighbourhood. It also facilitates upskilling of residents, particularly in how to better respond to **the climate crisis**.

A Lasting Legacy

BeeDP leaves a legacy for current and future generations. A continuous trail of green infrastructure is implemented and cared for by the community across Cardiff.

Outward benefits include **higher resident wellbeing** and **increased biodiversity**.
