

BUILT FOR THE ENVIRONMENT

Endorser pack

Global report published by RIBA in partnership with Architects Declare.

Background

Built for the Environment is a report published by the RIBA and Architects Declare that demonstrates the critical role that the built environment can – and must – play to reduce the alarming rise of greenhouse gas emissions.

The report brings together various pieces of research and evidence to encourage the sector to embrace and scale-up capabilities, and sets out key recommendations to governments ahead of COP26.

RIBA and Architects Declare now seek organisations from across the sector to endorse the report, which trails the Built Environment Summit – a two-day virtual conference on 28 and 29 October that will provide an opportunity for the sector to unite ahead of COP26.

Become an endorser

The climate emergency is the biggest challenge facing our planet and our profession. Built for the Environment sets out how we can bring about urgent change, and we want the whole sector to unite to amplify its messages.

By endorsing this report, you will:

- Be listed* in an updated version of the report for re-publication later this year;
- Be listed* at the Built Environment Summit on 28-29 October 2021;
- Be featured in RIBA's online promotion of the report.

Become an endorser [here](#).

N.B. RIBA reserves the right to decline an endorsement request.

**Listing includes an organisation's name.*

As a formal endorser, we also ask that you help to promote it. You could do this in several ways, from using social media and newsletters to briefing colleagues at meetings and events.

Draft messaging:

- How can the built environment decarbonise to limit global warming? @RIBA and @archdeclare have published report ahead of #COP26 outlining how the sector and governments can bring about urgent change. Read here:
- We're pleased to endorse the latest report from @RIBA and @archdeclare that brings together research from across the built environment to prompt the sector to scale-up its capabilities and set out recommendations to governments ahead of #COP26.
- Will you join us? @RIBA and @archdeclare are calling on the built environment to unite ahead of #COP26 and endorse the latest research on how to decarbonise the sector, from scaling-up capabilities to demanding tougher government targets. Find out more:
